SUPERIOR UNIVERSITY
- Bachelor of Computer Science

SKILLS

- Frontend Development
- Backend Development
- Database (MongoDB, Firebase)
- Version Control (Git Hub)
- Deployment (Vercel)

LANGUAGES

- English (Intermediate)
- Urdu

PROFILE

I am a Web Developer with a strong focus on frontend technologies, especially Next.js, and solid backend skills. With 2 years of hands-on programming experience, I've developed a passion for crafting engaging and efficient web applications. I continuously learn and improve my skills through both formal education and self-driven practice.

WORK EXPERIENCE

Project-Based Experience
Stock Management System

- Built a full-featured Stock Management System with CRUD operations (Create, Read, Update, Delete).
- Integrated MongoDB to store and manage product data.
- Developed a search feature to quickly find products and display them in a structured table format.
- Implemented a responsive and user-friendly web interface.
- Deployed the application on Vercel for easy access: https://stock-management-system-delta.vercel.app

Blogging Website

- Created a fully functional blogging platform where users can add blogs with images, headings, and tags.
- Implemented a preview page for blogs and displayed trending tags on the main page.
- Enabled tag-based filtering, allowing users to click tags to view blogs with the same trending tags.
- Integrated a detailed blog view that includes the author's name when a blog is clicked.
- Added search functionality to find blogs by username or blog heading.
- Integrated Firebase authentication, ensuring only logged-in users can access the blog-writing section.
